Cloud and APIs. He has also been a bestselling instructor many times at Udemy on courses at Apache Kafka and AWS. [To see the order in which I can take my course, see the FAQ below.] Stefan is recognized as an AWS Hero and is an AWS Certified Solution Architect Professional and AWS Certified DevOps Professional. He loves teaching people how to use AWS properly, how to get ready for AWS certification, and how it's most important to the real world. He also loves Apache Kafka. He sits on the 2019 Program Committee, which organises kafka summits in New York, London and San Francisco. He is also an active member of the Apache Kafka community and writes medium blogs and Confluence guest blogs. In his spare time he enjoys cooking, practicing yoga, surfing, watching TV shows and traveling to amazing destinations! FAQ: In what order do I need to learn?. AWS Cloud: Start with aws certified solution architect associate, then move on to AWS Certified Developer Associate and AWS Certified SysOps administrator. You can be an AWS Certified Solution Architect Professional or AWS Certified DevOps Professional, or you can make a special certification of your choice. When you're ready, you can learn more about AWS Lambda and AWS Cloud Formation, or do AWS Big Data Certification. Apache Kafka: Starting with Apache Kafka for beginners, developers can learn connections, streams, schema registries, and, if administrators, setup and monitoring courses. Both tracks are required to pass Confluent Kafka certification. gRPC: First do the protocol buffer course, then go to the gRPC Java or gRPC Golan course. To share knowledge, I cannot respond to private messages on Udemy. If you are a student, please ask questions in the course. Thank you for understanding!
